Smart Assisted Living

IPBuilding is a specialist with respect to technology and solutions for Smart Assisted Living. All technologies, care and services on a single user-friendly platform. Based on the worldwide standard of the Internet Protocol.

Who We Are

Modular, integrated total solution platform for technologies to permit elderly people to stay in their own environment due to ICT technologie.

- Open source platform upon which different hardware solutions can be integrated
- Modular extendable (various packages)
 - ✓ Security
 - ✓ Energy
 - ✓ Comfort
 - ✓ Deviant Behavior

Currently:

installations and technology are based on universal modern wiring

Goal:

Same technology & solutions for existing Homes & Buildings (wireless – plug and play)

Technologies must speak IP (Wordwide standard)

Project idea

Third Parties

Looking for

Synergies with various parties is of outmost importance when building and exploiting an assistance building. IPBuilding benefits all parties involved.

For the further development of our global integrated solutions we are constantly looking for new inovative partnerships with:

- Unversities for studies on Smart Assisted Living
- Research & Development companies for new product development
- Existing innovative technologie over IP to integrate

Goal:

One open source platform for ICT technologie
